SCE&G To Resume Tree Trimming Activities

SCE&G will be performing tree trimming activities along overhead utility lines beginning October 3, 2011 in the **Shandon Neighborhood**. The trimming will be completed by SCE&G contractors and work will be closely monitored on a daily basis by the City's 4 Certified Arborists from the Forestry and Beautification Division.

The purpose of the trimming activities is to increase safety and reliability of the electric service. SCE&G reports an 89% improvement in reliability in vegetation related outages in areas where trimming is completed compared to a year ago. The trimming guidelines include removing vegetation within 8-12 feet below and beside the power lines and up to 20 feet above the power lines.

SCE&G and their contractors trim in accordance with International Society of Arboriculture guidelines, using ANSI A300 pruning methods leaving good cuts that will generate new growth.

For more information about SCE&G's tree trimming efforts, including helpful tips and suggestions regarding the planting of trees and other vegetation, visit www.sceg.com/treetrimming.
